

Transportation practitioners are working hard to build better projects faster, cheaper, and more safely. Through the second Strategic Highway Research Program (SHRP2), a new body of knowledge now exists to help practitioners address pressing roadway needs.

Where Ideas Get Traction

SHRP2 offers dozens of ready-to-deploy solutions, as well as the critical technical and financial support needed to successfully apply these innovations. Explore how organizations across the country are using SHRP2 Solutions on hundreds of projects to save lives, money, and time.
